At 2 Fat Indians, we are deeply committed to environmental sustainability, and one of the key ways we demonstrate this is through our use of the Purezza water system. Traditional bottled water contributes significantly to plastic waste, with approximately 80% of plastic water bottles ending up in landfills and taking up to 1,000 years to decompose. By installing Purezza, we have eliminated the use of bottled water, significantly reducing our plastic footprint. This decision not only aligns with our sustainability goals but also allows us to provide our guests with fresh, filtered water in a more eco-friendly manner. Join us in our effort to create a greener future, one sip at a time.
